Пособие содержит 30 000 математических примеров по темам, изучаемым во 2 классе. Оригинальное построение материала позволяет обеспечить более глубокое его усвоение.

Как показывает практика, ученик полностью освоил программу, если решает пример и записывает ответ по истечении 4–7 секунд. В этом случае можно говорить, что навык счёта доведен до автоматизма.

На каждой странице приведены 6 столбиков по 52 примера. Если ученик решает столбик за 4–6 минут, это свидетельствует о хорошем уровне подготовки. На целую страницу у него должно уходить не более 30 минут. Чтобы достичь отличных результатов, каждый день следует решать по одной странице.

Пособие может быть использовано на уроках математики, а также для работы дома.
