Electronic Expansion

© by [Tone2.com](https://tone2.com)

Congratulations on your Purchase of the Electronic Expansion for Gladiator 2.

The 'Electronic expansion' is a preset and feature expansion pack for Gladiator 2. Designed by the professional sound designers Markus Feil, Bryan 'Xenos' Lee and Bastiaan van Noord, 'Electronic' is a collection of more then 300 sounds and new add-on features.

Impressive arpeggiator sequences, resonant basses, groovy drumlines, vocaloid sounds, cutting leads, chiptune sounds, techno stabs, rhythmic trancegates, deep housechords, atmospheric pads and ambient textures are among the many types of electronic sounds featured inside this expansion. A must have if you're looking for new sounds or if you want to expand Gladiator with more features.

Expansion highlights:

- 300+ inspiring, unique presets aimed at miscellaneous genres of electronic music
- Stereo Trancegate: Featuring no less then 22 patterns for rhythmic gate effects
- Reverb Ultra: Reverb Ultra uses a new high-quality reverb algorithm, its soft and diffuse sound make it especially suitable for larger rooms and sculpting the proper ambience.
- Three new early reflection effects: Early reflection, reverse reflection and gated reflection
- Aliaser: A LoFi retro-effect that works by mirroring the signal's spectrum at the cutoff frequency
- Stereo Enhance: A stereo width effect, equipped with a High-Shelf filter to expand the stereo field while keeping the lower frequencies intact.
- Three additional skins as free bonus content: Black, Gold and Red skin
